AboutMe

From the moment I produced "Hello World" in the console of my first application, I knew I was hooked into the world of programming. But being a programmer has never been "just a job" for me, it's offered an engaging challenge to continually learn and improve my skills in creating high-quality software.

I have been challenging myself to get better & better, do things looking hard or impossible at the first time, it gives me a full-fledged passion that only gets more exciting as the years go by.
